

TIGER DRILL PLUS

High Performance Viscosifier

Description

Tiger Drill Plus is a premium liquid co-polymer designed to provide rapid viscosity as well as having long shelf life where the liquid does not separate in the drum over time.

Applications

- Provides fast viscosity
- Stabilizes reactive clays and shales
- Lowers torque and rod chatter
- Reduces friction

Advantages

- Liquid does not separate in the drum and has a long shelf life.
- Liquid is concentrated so provides higher viscosity compared to normal liquid polymers
- Improved core recovery
- Can be used with foam for unconsolidated formations.
- Easy mixing

Typical Properties

Appearance	Milky white liquid
pH (1% Aqueous solution)	7.5 – 8.5

Recommended Treatments

Tiger Drill Plus should be mixed slowly into the circulating system using agitation or a venturi mixer.

- Normal drilling conditions – 1 to 2 litres/m³

Packaging

Tiger Drill comes in 20 L cubes.
