

TIGER THREAD GREASE

Thread Grease

Description

Tiger Thread Grease is a heavy duty thread compound containing metallic zinc and further fortified by a blend of additives to reduce wear, oxidization.

Applications

Tiger Thread Grease is specifically formulated with a high content of specially selected solid lubricant for the lubrication and protection of bolts, nuts and threaded joints where ease of removal is desired.

Advantages

- Prevents galling of rod joints
- Can be used in wet conditions
- Can be used in wide range of temperatures.
- Allows for easier breakouts and connections

Typical Properties

Appearance	Grey
Drop point , (°C)	185
Specific gravity	1.6 +/- 0.2
% Solids	40 to 60%
Brushability	Up to -12 °C

Recommended Treatments

Apply to joints and thread liberally where required.

Packaging

Tiger Thread Grease comes in 10kg pails
